

Managed DPS Growth Service

Public sector work is increasingly being procured through large **Dynamic Purchasing Systems (DPSs)** and frameworks. For providers, DPSs represent huge opportunity, but often result in frustration, rejection, or little return once live.

DPSuccess is designed to get you on frameworks **and** help you win work once you're there.

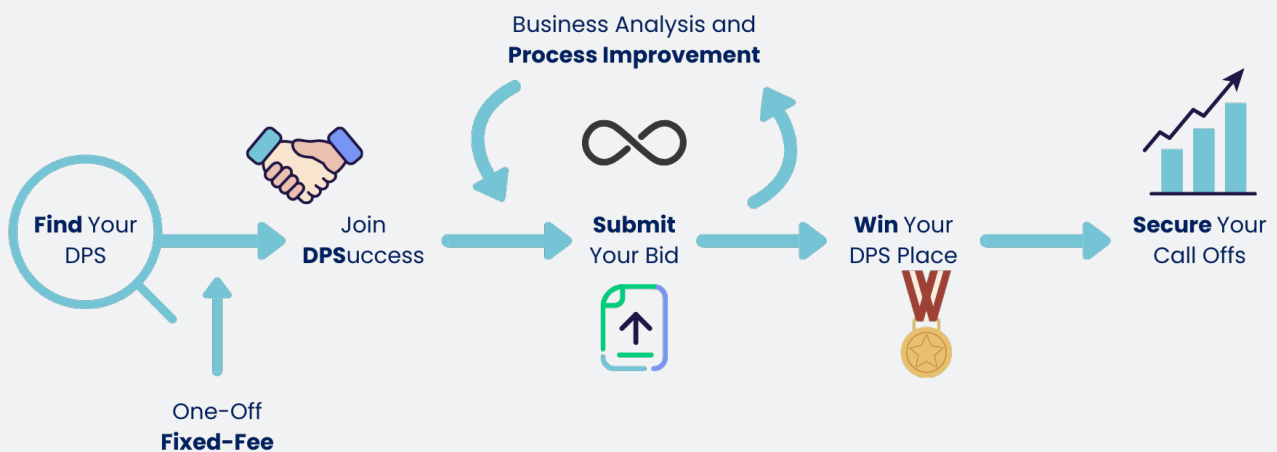

Why Most Providers Struggle

Many organisations experience:

- **Failed** DPS applications
- Sitting on DPSs with little or **no work** coming through
- **No strategy** for call-offs post-award

DPSs aren't a one-off bid. They're a **long-term growth channel** and they need managing.
